

John Geddes

Software Engineer

Chicago, IL 60618 · (612) 790-3691 · johngeddes@pm.me · johngeddes.org · linkedin.com/in/therealjohngeddes

Software engineer with a Computer Science degree and five years in enterprise IT. Ships production systems solo: a React Native app with on-device encryption, a course scheduler with a real constraint solver, and an internal platform reconciling eleven vendor APIs into one record per machine.

TECHNICAL SKILLS

- Languages** TypeScript, JavaScript, Python, SQL, HTML, CSS, VBA
Frameworks React, React Native, Expo, Node.js, Express, Vite, Tailwind CSS
Data PostgreSQL, SQLite, Cloud Firestore, MongoDB, Power BI
Platforms Microsoft Entra ID, Firebase, Docker, nginx, PM2, Git, Bitbucket
Enterprise JAMF, ServiceNow, Microsoft Intune, Azure Active Directory, Power Apps

SELECTED PROJECTS

Cipher Tracker cipher-app.org
React Native and Expo habit tracker for iOS and Android. Every entry is encrypted on the device with AES-256-CTR under a PBKDF2-derived key, so the server only ever holds ciphertext and there is deliberately no password reset. 548 passing unit tests.

Rambler Registrar github.com/jgeddes3/RamblerRegistrar
Course scheduler for Loyola students. A bounded depth-first search builds every conflict-free timetable from up to eight courses and scores each 0–100 against a published penalty model that knows the walk time between real campus buildings.

EXPERIENCE

Brag House January 2022 – May 2022
Computer Science Intern Part-time

- Worked with the development team in React.js, React Native, CSS and HTML on the front end of the company’s iOS app and website.
- Designed and implemented the Brago game inside the iOS app.
- Redesigned the app in Figma to the modern look the company wanted.
- Trained in Kotlin and Django to support the back-end developer, and ran user-testing sessions whose feedback drove UI changes.

TLC MilliMeter Wave Products January 2020 – August 2020
Software Intern Minneapolis, MN

- Moved the company off a primitive on-site code repository to cloud-hosted Bitbucket, then trained staff on git so the migration actually held.
- Helped design a COVID-19 detection radar in CAD, using millimetre waves.
- Flew drones for a collaboration with the US Air Force on a radar system for identifying hostile drones.

TAG — The Aspen Group September 2025 – Present
Senior Executive Desktop Support Engineer Chicago, IL

- Designed and built an internal device-lifecycle platform on top of the Snipe-IT REST API: a React 19 and TypeScript front end, an Express gateway adding Entra ID single sign-on, role-based access and a pooled service-token layer, and a PostgreSQL service that reconciles eleven vendor APIs into one record per machine.
- Added a reconciliation engine that raises and auto-closes flags where systems disagree, with every check gated on how recently its source last synced.
- Administer JAMF, ServiceNow, Microsoft Intune and Azure Active Directory across the enterprise.

ADDITIONAL EXPERIENCE

Discover — Audio Visual Specialist II (February 2025 – September 2025) · **Abbott** — Audio Visual Technician Tier 2 (October 2024 – February 2025) · **Kirkland & Ellis** — AV Support Specialist (March 2024 – June 2024) · **Loyola University Chicago** — Audio Visual Technician (January 2021 – May 2023)

EDUCATION

Loyola University Chicago
Bachelor of Science, Computer Science · Minor in Philosophy · 2019–2023
